

## Welcome to LeaderAI Project!

Whether you follow us from the beginning or you are a recent member of our team, thank you! Remember that not only you can follow the project on the newsletters you receive but also by following us on social media, where we release some updates of the project, and on the project's website:

Project website: <https://leaderai.eu/>

Follow us on social media:

### Project's results

#### THE LEADERAI INTERACTIVE ELEANING PLATFORM IS DEVELOPED AND READY FOR PILOTING!

Since our last newsletter, the LeaderAI project consortium has developed **an attractive and interactive eLearning platform**, that was created to act as an **“one-stop-shop”** providing instant access to a full suite of resources: the interactive Toolkit, a self-paced MOOC and a custom section demonstrating in-action the usage of AI-based and analytics tools.

Our platform is meant to:

- equip HE staff with a collection of hands-on digital teaching and learning materials they can access anytime-anywhere;
- demonstrate the usage of AI-based and analytics tools for personalised teaching and learning purposes;
- build HE staff's pedagogical and digital competences in personalising their courses through selected AI-based and analytics tools;
- allow HE staff to participate in a virtual community for knowledge sharing.

Interested individuals can freely register without specific entrance prerequisites. They can begin whenever they want and follow at their own pace and learning needs. This way, the platform supports the **“learning on the go”!**

Stay tuned! And use the educational resources provided by our platform at <https://iplatform.leaderai.eu/>.

### Partners activities and meetings

The Partners have been holding an online meeting in June 2024 and another face-to-face meeting in September 2024 in Nicosia – Cyprus (see us below), to keep up with the project work.

After finishing creating the digital resources for the eLearning platform (the learning scenarios and the 6 modules of the interactive toolkit), our consortium has localised and translated their content, as to be more relevant to the own contexts of the project partners.

Then, we accomplished the evaluation of the digital resources and the e-platform testing: both Alpha and Beta versions of the platform have been tested by individual users, in Aug-Sept 2024. In the Alpha stage, initial testing focused primarily on identifying and resolving technical issues, ensuring the basic functionality of the platform, and making necessary adjustments based on preliminary user feedback. The Beta testing implicated the participation of samples of end users in each country. This stage was more extensive and covered not only the usability and functionality of the platform but also the relevance and efficiency of the learning with the digital tools and contents.

### Next steps

Within the months remained until the end of the project until Dec 2024, we will conduct the pilot testing of the MOOC.

Furthermore, dissemination workshops in all partner countries will be organised (Nov-Dec 2024) to familiarise key stakeholders with the project's aim, objectives and outcomes. Target groups will be engaged with the LeaderAI resources, the basic deliverables will be presented to them (the Toolkit, the Scenario-based training, the eLearning platform with the MOOC) and lessons learned from the implementations will be discussed. The project's website and eLearning platform will be a reference point and participants will be prompted to use it for their personal and professional development.

This is our last newsletter, but you can keep-up with the project news by following us on FB and Twitter! We invite you to find the LeaderAI results on our website <https://leaderai.eu/> and access the LeaderAI MOOC courses and the interactive Toolkit at <https://iplatform.leaderai.eu/>.
